To: HR <hr@mavenvista.com>, Asha Mangtani <asha@mavenvista.com>

Please send me the training venue's exact address and training timing. So that I can book a hotel near the training venue.

The lab setup needed for this training is

- Projector
- Whiteboard or Flipchart.
- Speakers. (The trainer is going to play a 30-minute video on his laptop during the 2nd day of training)
- Participants PC/Laptop should have the following software installed
 - Microsoft Office
 - Adobe Reader
 - Visual Studio code with extension for Perl and Java installed. Alternatively, an equivalent editor or IDE may be used.
 - Java SE 1.8 or higher
 - Perl 5.26 or higher e.g. For Windows, [ActiveState Perl](#) can be installed.
 - [Astah UML](#) trial version installed with JRE. Alternatively, any other equivalent UML drawing tool may be used.
- Internet connection will be needed for Participants PC/Laptop. If the trainer gives a Github link, the participants should be able to download the file from [Github](#). Also, participants should be able to send/receive emails.
- Internet connection for trainer laptop is preferable, but not mandatory.

Thanks.
